DETAILED ACTION

Terminal Disclaimer

The terminal disclaimer filed on 9/29/03 has been reviewed and is not accepted.

The terminal disclaimer has been recorded.

The instant application ownership, right, title and interest in and to has not been established in the Terminal Disclaimer filed;

(Attorney Docket No. 8403.997 or US 10/674,182).

Specification

The disclosure is objected to because of the following informalities:

Paragraph [0001] should be updated to reflect the patent status of application 10/449,319.

Appropriate correction is required.

The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Objections

Claims 9-12 are objected to because of the following informalities:

The claim dependencies as cited are questioned for claims 9-12.

The Examiner believes the dependencies should read 8,9,10 and 8 respectively for dependent claims 9-12, and has been prosecuted accordingly.

Appropriate correction is required.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-12 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1, 2 and 8 of U.S. Patent No. 6,672,006.

Art Unit: 3644

Although the conflicting claims are not identical, they are not patentably distinct from each other because while the instant independent claims 1 and 8 are broadly encompassed by conflicting '006 independent claim-1, the instant dependent claims 3, 6 and 10 are an obvious variation of a stabilizing member as recited in the conflicting '006 independent claim-1; furthermore, instant dependent claims 4, 5, 7, 11 and 12 are identical to conflicting '006 claim-8, and instant dependent claims 2 and 9 are identical to conflicting '006 claim-2.
